

Product information

sTube

PB sTube bar is a very effective and simple solution to prevent contamination with legionella bacteria from your shower head. Among other things, the shower bar is used as an alternative to the anti-legionella shower head. The shower head is the most dangerous aerosol-forming tap point in many situations.

The shower bar is easy to install and immediately ready for use. The product can be fitted to any shower mixer with a ½" hose connection. We recommend replacing the shower head and hose at the same time. You can also order these from us. This ensures that you or your guests can shower safely.

Details

Supplied including

- Connections swivel ½"
- Filter module
- Drainage device
- Wall mount
