DeavX Base

The DeavX Base modules filter all microbiological particles from the water by ultrafiltration. Due to the very fine sieving effect of the membranes, the tiny particles are filtered from the water and clean and safe water comes out of the permeate.

The module is also an exchange module for the DeavX and aQuaproteQ lines. In case the DeavX Base is used for replacement in the aQuaproteQ, this has to be mentioned in the purchase order.
