

Product information

Shultra

The Shultra is a luxurious and robust 'Point of Use' solution for preventing norm violations directly at aerosol-forming tap points.

A self-flushing water filter and shower head are integrated into the stainless steel shower panel. Automated flushing of showers in connection with legionella prevention saves a considerable amount of time and money. Thanks to the PB filter, bacteria, including legionella, are removed from the shower water.

The Shultra has an industrial look and is a vandal-proof shower solution. This vandal-proof shower is frequently used in industrial washrooms and in regular and disability care.

Details

Delivered including

- Mounting plates
- Screws and plugs
- Possibility to connect to BMS
- 6V Battery

Art. nr.	Description	Capacity*	Dimensions HxWxD (cm)
