Dizzer S YFF

The Dizzer S YFF is the compact solution for reliable water purification. Thanks to the advanced Multibore Hollow Fiber membranes with a pore size of just 0.02 microns, this ultrafiltration module effectively removes microbiological particles, ensuring you always have clean and safe water.

For over 10 years, we have been producing the Dizzer S YFF elements in close collaboration with the former developer, serving various satisfied customers, especially in Europe. This module is perfect for those seeking efficiency and reliability in a small package.

YOUR FILTER FACTORY

Details

- Applicable for water up to 40°C | 104.
- Certificate: Membranes conform to NSF/ANSI 61-standards.
- Ask for technical datasheet.

Art nr.	PB name	Membrane M^2	Connections
1313000001	S 0.9MB60 YFF	6	1 1/2" BSP Female
